

Tree Plantation drive with Sustainability at its core!

Native species of flora and fauna boost conservation efforts and enrich the biodiversity of a place.

Keeping this in mind, our team of engineers planted 8 Neem trees at Dharavi Receiving Station.

Well Done Green Heroes: Singh Ramkrishna, Yogesh Dhongade, Dattkumar Bhasagi, Vikrant Bhuwad and Satish Jadhav

Finding a new 'home' for our plants with Tree Rehabilitation !

TP Solar Ltd volunteers re-planted 30 trees of nearly 10 feet which had to be uprooted from our project site at 4 GW Solar Cell & Module Manufacturing, Gangaikondan SIPCOT, Tirunelveli District, Tamilnadu. These trees were replanted at Govt. Hr. Sec. School, Vadakku Cheliyanallur with the participation of students.

The students vowed to take care of the trees to ensure 100% survival rate. We also provided the school with materials necessary to support the watering of trees.

Kudos to Mr. Ajith Prasad Shetty, Chief – Manufacturing & Project Expansion who initiated and guided this tree rehabilitation activity.

EV charging Point from scrap-taking sustainability to the next level!

Team DNMG North Zone used scrap material to build 4 EV charging points, that can charge a total of 8 EV vehicles simultaneously. The points are being used to charge companies EV vehicles.

This creative initiative has helped in reducing costs, reuse scrap and save resources.

**Applause for our creative Green Heroes:
Mr. Ramesh Kharat, Mr. A C Dalvi, Mr. I M Gore,
Mr. Rohit Bamgude, Mr. Vasant Rathod,
Mr. Ibrahim Patel, Mr. Naidu Venugopal**

Before

After

Upcycling Dog House to a storage yard with locally sourced scrap!

Instead of scrapping the unused Dog house at MDO Urban zone BMC DSS, we decided to upcycle it and give it a new lease of life.

The Dog House was remodeled into a storage place to keep the transformer oil drums. All the material required for modification were sourced from scraps of other jobs carried out in the zone.

Savings achieved: Modification costed- Rs. 15.5 Thousand & savings achieved Rs. 1.5 lacs including M.S Material & Services cost for erection of new storage yard.

Caring for the wild while leading the energy sufficiency!

Transmission Projects - Kalwa Salsette 5 cable project team, spotted non-venomous common sand boa near the cable trench. The team immediately called the snake rescuer, and the snake was rescued and released into its natural habitat before the work proceeded.

Benefits : Preserving wildlife species help the ecosystem.
