

## Sustainability with innovation in construction!

As part of continual sustainable initiative implementation at SRA Project site, we used eco-friendly curing compound for curing of concrete. This initiative of using curing compound instead of water saved 56 million litres of water.

It will help in IGBC certification, achieving sustainability, conservation of water and cost saving by eliminating electricity consumption & man power required for frequent curing using water.

## Recycling to restore the earth's balance!

Team Civil (Distn & Ev Proj) reused 6.75 MT of salvaged structural steel for construction of material storage shed at Chunabhatti Store.

### Benefits

- Saved Rs. 5.75 lakhs
- Reduced carbon emission from production of new steel.

**Green Heroes: Yogesh Dhongade, Suresh Kondubhairy and Ramnageena Gupta**

## Recycling of Scrap Inverter Room Door into Display Board & SLD Board!

In Panchapatti - 50MW, the inverter room door was recycled, as part of resource optimization. The door was utilized to make a display & SLD board.

Scrap wooden portions from the door was utilized and frame for the board was sourced from local market and fixed by the site team.

### Benefits

- Saving Rs. 9000 INR
- Reduced the Opex cost.
