

Saving sapling!

Tree plantation is a good deed but taking care and nurturing it after is important. Mr. Amit Malviya from Mangalwedha, Solapur saved the sapling of mango after it started drying. With the help of security supervisor Mr. Ramdas Jadhav, he removed dry part of trunk and pasted cow dung on sapling's trunk. After 15 days, new leaves started growing on saplings.

Good work!

Benefits:

Nurturing saplings after plantation improves survival rates of the plant.
