

## When scrap stepped in to carry the weight

Team MMD Bhira used scrapped material to make the rope drum stand. Around 1000 Kg of waste MS material was reused in this activity, resulting in resource and energy saving.

## Conserve water, conserve life!

Our green warrior from Bangalore solved the problem of water scarcity in his village by using some innovative water conservation tactics. He constructed water conservation ponds that filter rainwater and improve ground water tables.

## Making every drop count

The condenser vacuum pump sealing water was overflowing at Trombay Unit 8. To avoid this wastage of water, our green heroes initiated a project and provided for a tank in the condenser pit.

The saved water is transferred to sewage treatment plant tanks, resulting in an annual saving of 21.2 lakh litres.

## Reuse for a brighter tomorrow

Mumbai Distribution North Zone team repaired and reused the scrap feeder pillars, resulting in cost savings of rupees 3 lakhs.

Kudos for saving costs and resources!

## Building a green cover, one tree at a time

To improve the green cover and oxygen levels near the site area, team WSPBL planted 8 trees on the occasion of World Environment Day 2022.

Did You Know - A single tree can provide one day's worth of oxygen for a family of four.
