

Handmade Diwali Kandil (Lantern) at Dharavi office!

Dharavi Office attendants team followed 4R principal and created something extraordinary from use of simple raw material. They used eco-friendly material like bamboo, cloth and waste paper to make Kandil (lantern) for Diwali decoration. They also used waste tea cups (After washing and drying them out) to make lamps.

Good work!

Benefits:

- Reusing waste material

Scrap used for LPDA antenna installation!

In Mumbai distribution use of FRTUs for Automaton in CSS is extensive. A frequent issue with these CSS was lack of network signal in certain areas. So to rectify the issue a special antenna LPDA type was required to be installed. For installation a pole was needed to align the antenna in proper orientation. Instead of procuring separate poles, the team utilised scrap piping structure recovered from repairing of false roof at market city DSS. This not only saved money but also contributed significantly in green index and our organization's goal of being carbon neutral.

Good work!

Benefits:

- Reuse of scrap
- Saving of cost
- Saving of time
- Better housekeeping
