

Green Champion to the rescue!

"I found an injured squirrel kitten injured from falling from a tree near my house. Due to the injuries, it was not able to climb up the tree again, hence I brought him home to give him primary first aid and some milk. My family and I took care of the squirrel kitten for a few days, nursed it back to health, and once it was healthy enough we released it back to its natural habitat."

Good work.

Powering A Greener World

Green warriors from WREL!

Tata Power Green Champion, Mariya Lourdu Evaris J from WREL-34mw Kodihalli site, Karnataka, independently planted more than 300 saplings across sites so far and donated many saplings to nearby schools. This summer with the help of his colleague Hanumesh Kurubara, he planted 15 tree saplings.

Kudos to both Green Champions!

Note-

The plantation of native trees improves habitat while enhancing the local ecosystem.

Water recovery project @Trombay!

In their efforts to address the water wastage caused due to overflowing at Trombay Unit 8 Vaccum Pump, A team of engineers worked on the recovery of water by providing a tank in a condenser pit. From the pit tank, the water will get transferred to sewage treatment tanks, where it will get recycled.

Kudos to green heroes!

Benefits:

- 21.2 lakhs of water will be saved with this project.

4R principle for optimized resource consumption!

A team of engineers from Walwhan Solar MH Limited, Mangalwedha, and Solapur made smart use of old empty oil drums to make canopies for fire extinguisher equipment, contributing to both circular economy and safety.

Good work Team!

Benefits:

- Scrap reuse thereby reducing landfilling
- Enhancing fire-safety

BEFORE :

AFTER :

Greenolution by Trombay CLP!

Team Trombay CLP effectively reutilized scrap grease drums and an old conveyor belt by converting these into seating arrangements at the coal berth area.

Reusing scrap instead of installing new assets reduces resource mining and emissions.

Kudos to Trombay Green Heroes!
