Dare to Care?

Energy is a precious commodity, yet goes wasted in a lot of instances in one's day-to-day life. Join hands with Greenolution as it brings to you its campaign to conserve energy. So, do you **Dare to Care?!**

Follow these few tips each day and help save power:

Turn off lights when you leave the room or an area that is unoccupied, especially at night and on weekends.

Take advantage of sunlight, if you can. During the day, work in rooms with windows where you don't need artificial light.

Shut down computers and turn off monitors at the end of the day.

Consider updating aging computers, monitors and printers with newer, more power-efficient versions.

Use laptop computers and ink jet printers, if available, since they use 90% less energy than desktop and laser printers.

- Set printers and copiers to go into a "Power save" mode after one hour of idle time, and turn off over weekends.
- Limit use of passenger elevators by using stairs when possible.
- Close drapes and blinds to keep heat/cold out.
- Adopt a last-person-out policy. The last person to leave labs, lecture rooms and meeting rooms should be responsible for turning off lights and unnecessary equipment.
- Turn off lights in unoccupied offices, classrooms, conference rooms and restrooms. Check these areas as you leave the office for the day, especially before weekends and holidays.

SAVE ENERGY

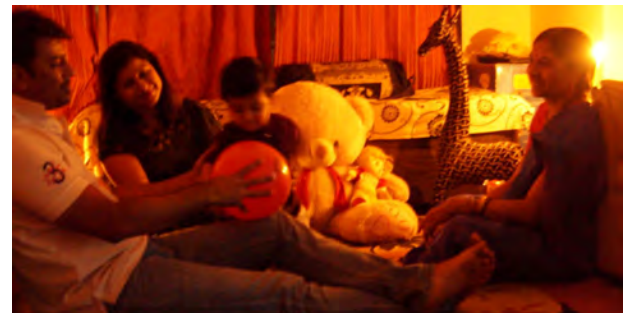

COVER STORY

Did you spare an hour for Earth, this Earth Hour?
Well, your colleagues did and how?!

1. Ms. Trusha Biswas (Lead Engineer – Operations, Trombay) organized a theme-based candle light party for her son and his friends. Eleven kids (between 4 and 12 years) were invited to the party. Ms. Biswas decorated her house with fallen tree leaves. A painting competition was also arranged for kids below 7 years. The kids were served green puri (made from spinach) in different geometric shape (circle, triangle, square, rectangle, etc), cake and fruit juice. The celebration ended with a dance party and with all kids pledging to switch off lights whenever not needed.

2. Mr. Ankit Khare, Lead Engineer – GIS, Dharavi, spent a quiet evening with his family on March 19! Candlelight, family for company, what more does one need?!

3. Mr. Jai Wardhan, Shift Incharge – Operations, Jojobera, and his team comprising Babulal Singh (CRE), Roshan Lal (CRE), Khileshwar Rajak (FE), Tushar kant Bahera (FE), Abhinav Goswami (C&I Engg) and Nawneet Kumar (Electrical Engg) switched off all unnecessary lights, except DC lights, during Earth Hour

4. Mr. Varinder Singh, Lead Associate - Strategic HR, and his friends switched off all unnecessary lights between 8:30 and 9:30 pm, i.e. during Earth Hour.

5. Mr. Jinesh Sanghani, Lead Engineer – Safety, CGPL, celebrated Earth Hour with this family in the most exciting way there could be!

The Sanghanis switched off all electrical appliances, including TV, refrigerator, fan, lights, etc, a minute prior to the scheduled time. The family then enjoyed a hearty meal together, in moonlight, on their terrace!

Greenolution lauds their efforts!!!
